Revision 1

Date: 02 May 2019

Admin will control everything, search everything, edit, delete, modify anything, this will require a master password.

Admin can see which agent register which shop on which date, admin can see every detail about shops and agents. If a shop owner registered his shop, then there should be registration date and time too which can be seen by admin too. If agent edit or makes any correction during shop verification then they can see when admin verified this shop. If they make any correction in future then it can be also seen with date and timestamp.

Admin can see how much salary he gave to agent.

Can know everything about ads, how much he earned through ads between dates, monthly, total.

Create registration packages for shops.

Create ad packages for shop ads.

Can create promotional registration packages for specific shop owner.

Create coupons

Chat support for admin, so that visitors can easily reach to admin.

Geotag for location, show nearest shop to user location.

AGENT:

When a shop owner registers his shop himself, then this goes for verification to admin and agent both. Then both can verify it. If an agent verifies it, then it goes to admin first then admin will check and verify it.

Register shops. Check registration form filled by shop owners. Can see all the shop registration details.

If there is anything wrong then he can correct them using his login id. When he corrects them there should be a mention of date and time of editing by which agent, it can be seen by admin too. After that agent can proceed that form to admin, then admin will verify this form once again. If admin thinks the provided info is correct then he can list that shop on website.

Without agent ID no shop owner can register (decision to be taken, for now don't do it. I will tell you when to do it.).

Agent will get commission on the basis of per shop registered. This commission can be changed from admin panel anytime.

Agent will have unique ID. In agent dashboard, they can see how many shops they registered. How much commission they got by registration on which date, how much they withdraw on which date and remaining amount.

They can see total shop registered, shops registered between dates, monthly shop registered. Total amount, monthly amount, amount between dates.

Agent will send a withdraw request to admin, admin can approve or disapprove it. Same as champs. (Decision to be taken later.)

SHOP OWNERS

Have unique id

Can register only. List their services and product. Write their intro about their shop or service, upload banner, photo etc. Select his package.

They cannot make any changes after form submit. If they want to change something after form submit, they have to contact admin or agent. Whoever makes correction should be seen as LAST UPDATED on 26/04/2019 (date and time stamp.) by AgentID/Admin.

Customers can directly chat with shop owners.

There are other things too, will send you soon. Can't send it now. Will send it by day after tomorrow.
